5- Customers:

- a. Creating projects.
- b. Customer layout (profile) includes:
 - i. Customer information: Photo, description, FirstName, LastName, Mobile, Email.
 - ii. All the Current projects that not delivered yet.
 - iii. All the previous projects that have been delivered to him by the PM.
 - iv. Control Projects Module:
 - 1. Remove Projects: remove the projects but if it has been assigned to PM then it cannot be removed.
 - 2. Add Projects.
 - 3. Assign Projects to PMs.
 - 4. Edit Projects.

Layouts:

1- Home Page Layout:

- a. Include Two Parts:
 - i. First Part: A form that the customer uses to post the new project.
 - ii. Second Part: All the Current not assigned projects (projects not assigned to PM).

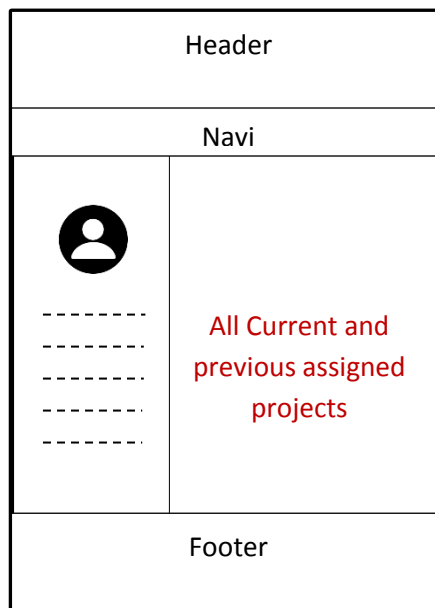

Home Page

- b. How it work:
 - i. Only Customers that could use the form to add new projects.
 - ii. When the Customer adds a new project, it will allow any PM to submit the form, and then the customer will choose one of the PMs which is the most appropriate PM to manage this project.
 - iii. When the customer assign a PM then the post will be hidden from the Home page cause the Home page must have all Current not assigned projects.

2- Admin, Project Managers and Team Leaders profile:

a. Include:

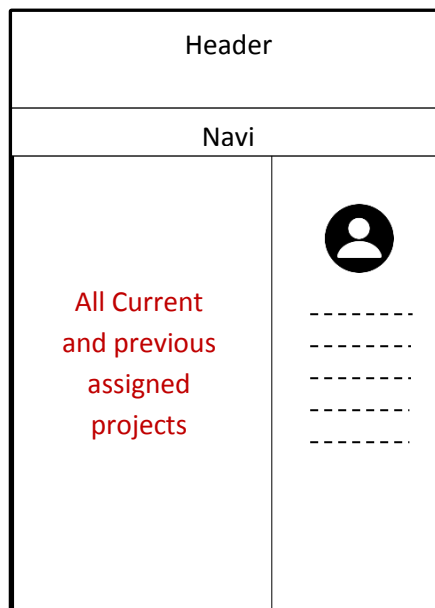

- i. First Part: Actor personal Information.
- ii. Second Part: Statistical Diagrams for PM and TL Only. (exclude the Admin)
- iii. Third Part: See all requests send from other actors (PM and TL Only).
- iv. Fourth Part: Send responses to other actors (PM and TL Only) to accept joining the team or reject.
- v. Fifth Part: All Current Assigned Projects.
- vi. Sixth Part: All the Previous Delivered Projects.
- vii. Seventh Part: Admin Could Control Users as Explained in the Roles Part.
- viii. Eighth Part: PM and TL Could Control Projects and Users as Explained in the Roles Part.

Admin, PM and TL
Page Layout

3- Customer and Junior Developers Page Layout:

- i. First Part: Actor personal Information.
- ii. Second Part: Statistical Diagrams for JDs Only. (exclude the Customer)
- iii. Third Part: See all requests send from other actors to the JDs to join their teams.
- iv. Fourth Part: Send responses to other actors to accept joining the team or reject (this case for the JDs Only).
- v. Fifth Part: All Current Projects.
- vi. Sixth Part: All the Previous Delivered Projects.

Customer and JD
page Layout

Important Notes:

- 1- Create Two Popups:
 - a. First Popup: For Login.
 - b. Second Popup: For Registration.
 - c. The Login popup is the first thing that will be open when the application runs, and it is a popup appeared from a button in the Home page.
 - d. If the users don't have an account then he will register.
 - e. These two popups are appeared from a button in the Home Page.
- 2- Customers **only** are allowed to use the form in the Home Page to create new projects.
- 3- Customers **only** are allowed to choose the PM and assign him to the project.
- 4- PMs **only** are allowed to open and submit the posts created by the customers in the home page.
- 5- TLs and JDs are not allowed to interact with the home page (read only).
- 6- Customers can add new projects from their profiles then it appears in the home page (it is another way for the customer to add new projects).
- 7- When the PMs are assigned to the project by the customer, then the post disappear from the home page.
- 8- When the PMs Left the project, then the post appear in the home page.
- 9- Draw Statistical Diagrams as explained above in the role part depending on the experience and Number of projects deliver by the actor.
- 10- When the Customer add new project in the home page, PMs **only** are allowed to write comments to that Post.
